ProtectAdvisr
Door Management Application

The ProtectAdvisr™ Doors application is a web-based solution to streamline the management of fire and smoke door compliance. Backed by our team of compliance and Life Safety experts, the application goes beyond a typical work order system to encompass the fire and smoke door inspections process. It can be used stand-alone or in conjunction with our door inspections consulting services.

Maintain an accurate inventory of all of your fire and smoke doors and assemblies, including the door information and historical inspections data. ProtectAdvisr maintains comprehensive compliance details and documentation in accordance with NFPA 80 and NFPA 101.

		Inspection				Repair		Final Status
	Inspection Date	Inspection Result	Failure(s)	Comments	Remediation(s)	Repaired, Reinspected & Passed Date		
1	5/19/2023	Fail	3: Holes 8: Mods 19: AuxHdwr		Repair	8/7/2023		✅
2	4/25/2023	Fail	3: Holes 11: Damage 21: Gasketing		Repair	4/25/2023		✅
3	2/24/2023	Fail	3: Holes 8: Mods 18: AutoBolt		Maintain	2/24/2023		✅
4	2/24/2023	Fail	3: Holes 8: Mods 18: AutoBolt					❌
5	2/17/2023	Fail	4: Door Label 13: Vision Panel 22: Gap at Frame		Replace	2/17/2023		✅
6	8/10/2022	Fail	3: Holes 11: Damage 21: Gasketing		Repair	8/10/2022		✅
7	9/17/2020	Fail	8: Mods		Repair	5/17/2021		✅
			4: Door Label	Door rated 45-mins - per				

DOORS APP ADVANTAGES

+ **ROI-Driven Efficiency:** Save up to 4 hours per month for leadership and countless hours for inspection staff.
+ **More than a CMMS:** ProtectAdvisr offers details specific to door inspection requirements.
+ **Curated Checklist:** The application generates a tailored checklist based on your door inventory, ensuring that no critical aspect is overlooked during inspections.
+ **Data Analytics:** Enable data-driven maintenance strategies and prevent costly repairs down the line.
+ **Enhanced Compliance:** A standardized format for door inventories and inspections eliminates the risk of documentation loss, which helps proactively address compliance issues before they escalate.
+ **Electronic Documentation:** Eliminate cumbersome paper records and digitize all inspection data, for seamless documentation and access to historical records and AHJ inspections.
