

ProtectAdvisr

Inspections, Testing + Maintenance (ITM)

The ProtectAdvisr™ ITM Application is a web-based solution designed to help businesses achieve and maintain compliance with fire and life safety regulations. It provides clear guidelines and exact code references, making it easy to understand and meet specific code requirements for buildings and environments. The app streamlines the scheduling, tracking, and documentation of inspection, testing, and maintenance activities, ensuring timely compliance and a complete record from failure identification to corrective actions and re-tests.

The ITM app offers insights into vendor services, helping organizations manage and track providers, identify service gaps, and ensure accountability.

Get a holistic and scalable view of an organization's entire portfolio, allowing for the identification of systemic issues and efficient resource allocation to address failures. This comprehensive approach not only reinforces compliance but enhances operational efficiency and risk management.

ITM App Features

- + Identifies requirements needed based on building systems
- + NFPA and AHJ Code References
- + Comprehensive Scheduling and Task Tracking
- + Vendor Management
- + Records/Documentation Storage
- + Remediation Workflows
